Letos posvečamo MUSEOEUROPE kuhinji, hrani in prehranjevanju. Vzpostavljamo povezave med ognjiščem in tehnološkim razvojem kuhinje, med hrano kot poljem estetskega raziskovanja in pomenom njene lokalne pridelave, med motnjami prehranjevanja in javnim konzumiranjem hrane, med hrano v umetnosti, kulturi in politiki... Izpostavljamo dobre prakse v muzejskih postavitvah in pedagoških programih.

Museoeurope 2017 focuses on kitchen, food, and nutrition. This year's project establishes the relations between the fireplace and the technological development of the kitchen, between food in the sense of aesthetic examination and the importance of its local production, between eating disorders and public consumption of food, between food within the art, culture, and politics. The symposium will also highlight examples of good practice in museum exhibitions and pedagogical programmes.
