

Dear,

Slovenian National Building and Civil Engineering Institute (<https://www.zag.si/>) is organizing multidisciplinary summer school (**2nd – 4th July 2024**), covering multiple-scale non-invasive techniques for assessment and in situ characterization of built heritage. A wide range of international experts dealing with sensitive heritage material will provide various cutting-edge lectures for future-led approaches in heritage science.

The 1st International 2024 Summer School: ***In situ techniques in preservation of built heritage*** will be held in person in Ljubljana, Slovenia, with no admission fee. Master's degree students, doctoral students, and young doctors, as well as interested established experts are invited. The school will be based on lectures, experimental presentations, guided tour with a presentation of techniques, and social events.

The deadline for registration is **June 3rd, 2024**.

Applications are being collected at: [link](#).

More information and the program of the 1st International 2024 Summer School are provided in the attachment and at <https://www.zag.si/raziskave-in-razvoj/dediscinska-znanost/poletna-sola/> or contact maruša.mrak@zag.si.

You are kindly invited to join us.

Kind regards from the Organizing Committee.
